BIM Standards for Automated BEM Structural Analysis and

The numerical computations required for structural analysis are well defined and easy to automate. If structural analysis is to be automated fully, however, the modeling process, as well as the numerical computations, must be automated.

Structural analysis and design is a very old art and is known to human beings since early civilizations. The Pyramids constructed by Egyptians around 2000 B.C. stands today as the testimony to the skills of master builders of that civilization. Many early civilizations produced great builders, skilled craftsmen who constructed magnificent buildings such as the Parthenon at Athens (2500 years ...

The buckling analysis was the only analysis made to the fuselage because buckling is in the most cases the most critical condition to the fuselage. The design moment and shear load of the fuselage are $M_y = 1.03 \times 10^6$ N·m
