

### **fetal heart rate monitoring pdf**

FEATURE Intrapartum fetal heart rate monitoring is the most common obstetric procedure performed in the United States. In 2002, 85% of the approximately 4 million live births in the United States were evaluated with electronic fetal monitoring (EFM). Fetal heart rate (FHR) is controlled by a balance between the fetal sympathetic and

### **Fetal heart rate monitoring update: the good, the bad, and**

The normal baseline fetal heart rate is 110 – 160 bpm. A heart rate of less than 110 is defined as a fetal bradycardia. Fetal heart rate variability is a normal feature and should be in the region of 5 – 15 bpm.

### **FETAL HEART RATE MONITORING - Mother Baby University**

Fetal heart rate monitoring may help detect changes in the normal heart rate pattern during labor. If certain changes are detected, steps can be taken to help treat the underlying problem.

### **FAQ015 -- Fetal Heart Rate Monitoring During Labor - ACOG**

Electronic fetal heart monitoring is not a substitute for appropriate professional nursing care and support of women in labor. Perinatal nurses are most often the primary health care professionals responsible for FHM. AWHONN's Guidelines for Professional Registered Nurse Staffing for Perinatal Units (2010) outlines specific staffing recommendations for administering FHM. These guide ...
