

## **fiber optics in communications pdf**

Optical fiber is used as a medium for telecommunication and computer networking because it is flexible and can be bundled as cables. It is especially advantageous for long-distance communications, because light propagates through the fiber with much lower attenuation compared to electrical cables.

## **Optical fiber - Wikipedia**

Fiber-optic communication is a method of transmitting information from one place to another by sending pulses of light through an optical fiber.

## **Fiber-optic communication - Wikipedia**

Uses for fiber optics. Shooting light down a pipe seems like a neat scientific party trick, and you might not think there'd be many practical applications for something like that.
