Metric spaces for program improvement (pdf, bibtex) Jennifer Hackett and Graham Hutton. In preparation, 2018. Improvement theory is an approach to reasoning about program efficiency that allows inequational proofs of improvement to be written in a similar manner to equational proofs of correctness.

In computer vision, the fundamental matrix is a  $3 \times 3$  matrix which relates corresponding points in stereo images. In epipolar geometry, with homogeneous image coordinates,  $x$  and  $x' \in \mathbb{R}^2$ , of corresponding points in a stereo image pair,  $Fx$  describes a line (an epipolar line) on which the corresponding point  $x' \in \mathbb{R}^2$  on the other image must lie.

Fundamental Principles of Cognition If cognitive science is a real and autonomous discipline, it should be founded on cognitive principles that pertain only to cognition, and which every advanced cognitive agent (whether carbon- or silicon-based) should employ.
