Seismic evaluation and retrofit of unreinforced masonry building with flexible diaphragms Seismic evaluation of a four-storey unreinforced masonry building with flexible diaphragms is illustrated. Only a detailed evaluation using the new special procedure is presented. It accounts for the flexibility of diaphragms in the lateral load analysis. Two retrofit options are illustrated. They involve ...

Seismic Evaluation and Strengthening of Existing Buildings

Seismic Evaluation and Retrofit of Existing Buildings describes deficiency-based and systematic procedures that use performance-based principles to evaluate and retrofit existing buildings to withstand the effects of earthquakes. This next-generation standard combines the evaluation and retrofit process and puts forth a three-tiered process for seismic evaluation according to a range of ...
